Progress on the Negotiations with the IMF

The Ministry of Finance and the Bank of Thailand wish to update the public that over the past week the authorities have been working together with the International Monetary Fund team to assess the present economic situation and outlook in Thailand, including the balance of payments, with a view to developing a comprehensive package of policy measures necessary to stabilize long-term macroeconomic conditions and lay the basis for a restoration of sustainable growth and financial institution system stability.

Discussions have been going well and the key policy elements of such a package are falling in place. Work will continue to develop and all details of a comprehensive policy program be finalized as expeditiously as possible.

The Ministry of Finance
