The Bank of Thailand Bond Issuance Programme for 2026

The Bank of Thailand (BOT) issues BOT bonds as one of the monetary policy instruments used to manage money market liquidity, while fostering the development of a liquid debt securities market in Thailand. The annual BOT bond issuance programme is regularly communicated to the market at the start of each year to facilitate smooth and efficient liquidity management among market participants.

For 2026, the bond issuance programme considers the projected liquidity condition in the market, the expected demand for public debt securities and the overall public sector bond supply. To this end, the BOT and the Public Debt Management Office (PDMO) have been collaborating closely on bond issuance in order to maintain an appropriate level of overall public sector bond supply throughout the year.

For the BOT Bond Issuance Programme for 2026, **the auction sizes for 3-month and 1-year bills are raised** to 35,000 - 75,000 and 25,000 – 65,000 million baht per auction respectively. **Additionally, the maximum auction size for the 6-month THOR-linked floating-rate bonds is raised** to 40,000 million baht per auction. These adjustments aim to align with market conditions.

1/ There is still no auction for BOT 6-month bills and 3-year fixed rate bonds in 2026.

2/ The outstanding size per issue includes additional 20% maximum amount that may be allocated in the Post-Auction Options (PAO).

3/ There will be 2 reopenings for each 2-year fixed-coupon bond and 5 reopenings for each 2-year THOR-linked floating-rate bond.

For the monthly bond schedule, auction sizes will be determined based on the prevailing conditions in the money and bond markets, as well as the government and SOE's bond supply at the time. The BOT will continue to collaborate closely with the PDMO and will announce the monthly auction calendars on the BOT website as customary.
