

Press Conference Monetary Policy Committee's Decision 3/2024 12 June 2024 Piti Disyatat Assistant Governor, Monetary Policy Group

The Committee voted 6 to 1 to <u>maintain</u> the policy rate at 2.50 percent. One MPC member voted to cut the policy rate by 0.25 percentage point.

- The Thai economy continues to expand, driven mainly by domestic demand and tourism. While export growth remains subdued, some merchandises are facing additional pressure from higher competition. Therefore, the recovery of exports and manufacturing sector should be closely monitored.
- Inflation is projected to return to the target range since the fourth quarter of this year as the impact of both supply factors and government subsidies are gradually phased out.
- Financial conditions remain stable. Business loans outstanding continue to expand. Debt deleveraging is on-going. However, there remains a need to monitor some groups of SMEs and low-income households who face tighter credit conditions.
- The current policy interest rate is consistent with both economic growth and macro-financial stability in the longer term.

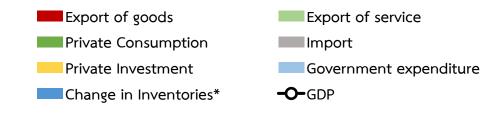

The Committee will closely monitor economic developments, and take into account growth and inflation outlooks in deliberating monetary policy going forward.

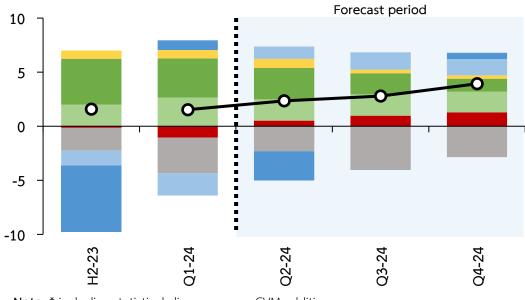

The Thai economy continues to expand...

Growth projection is largely unchanged from previous forecast

Contribution to GDP growth

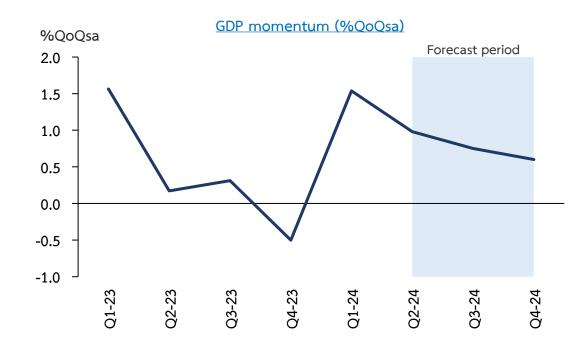

Note: * including statistical discrepancy or CVM additive error.

ธนาคารแห่งประเทศไทย BANK OF THAILAND Inflation is expected to return to the target range since Q4 of this year

Note: *Underlying Inflation trend (MUCSVO trend) calculates based on Stock and Watson (2015). **Source:** Ministry of Commerce, BOT calculations. Inflation would fall below the target range in Q3 due to base effect

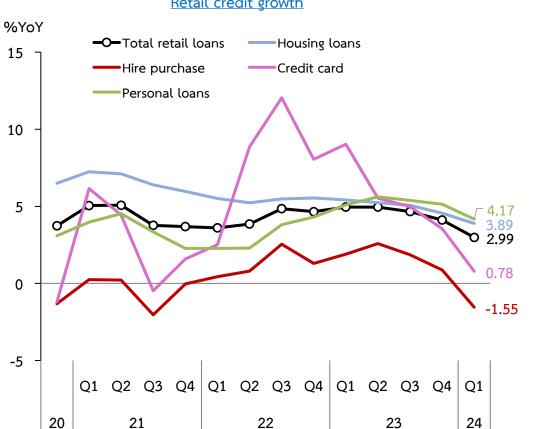

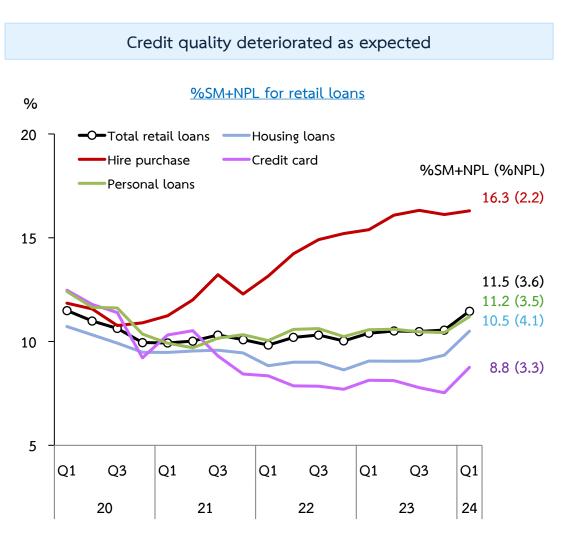

Household credit slowed, especially hire purchase and credit cards

Growth of hire purchase and credit card loans declined relatively more than other loan types

Retail credit growth

Note: Dataset covers commercial banks, SFIs, subsidiaries of banks, and non-banks under the supervision of the BOT, which accounts for 60% of total household debt

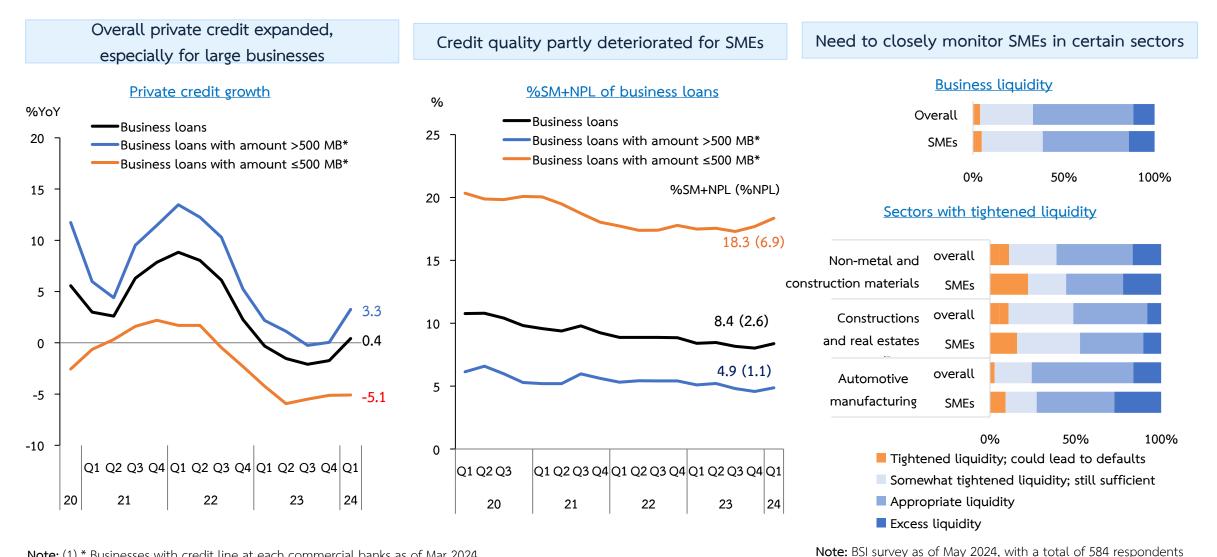

(different dataset from the Banking Sector Report which denotes retail loans as 33.5% of household debt)

Source: BOT

Overall business loans continue to expand,

however, need to closely monitor credit conditions for SMEs

Note: (1) * Businesses with credit line at each commercial banks as of Mar 2024

(2) Dataset covers all commercial banks' private credit

from 604 surveyed
